

Nrg1-Flox

系統名	C57BL/6Smoc- <i>Nrg1</i> ^{em1(flox)Smoc}
SMOC番号	NM-CKO-226473
維持形態	Sperm cryopreservation

遺伝子の概要

Gene Symbol Nrg1	Synonyms	GGF; HRG; Hgl; NDF; ARIA; SMDF; GGFI; HRGalpha; 6030402G23Rik; D230005F13Rik
	NCBI ID	211323
	MGI ID	96083
	Ensembl ID	ENSMUSG00000062991
	Human Ortholog	NRG1

説明

These mice carry loxP sites flanking exon 2 of *Nrg1* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Nrg1* gene.

*Literature published using this strain should indicate: *Nrg1*-Flox mice (Cat. NO. NM-CKO-226473) were purchased from Shanghai Model Organisms Center, Inc..
