

Npc1l1-Flox

| | |
|--------|---|
| 系統名 | C57BL/6Smoc- <i>Npc1l1</i> ^{em1(flox)Smoc} |
| SMOC番号 | TBD |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|-----------------------|-----------------------|------------------------------------|
| Gene Symbol Npc1l1 | Synonyms | Gm243, 9130221N23Rik |
| | NCBI ID | 237636 |
| | MGI ID | 2685089 |
| | Ensembl ID | ENSMUSG00000020447 |
| | Human Ortholog | NPC1L1 |

説明

These mice carry loxP sites flanking target exons of Npc1l1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Npc1l1 gene.

*Literature published using this strain should indicate: Npc1l1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
