

Tdrd12-Flox

系統名	C57BL/6Smoc- <i>Tdrd12</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Tdrd12	Synonyms	ECAT8, repro23, EG434165, G1-476-14, 2410004F06Rik, 2410070K17Rik
	NCBI ID	71981
	MGI ID	1919231
	Ensembl ID	ENSMUSG00000030491
	Human Ortholog	TDRD12

説明

These mice carry loxP sites flanking target exons of Tdrd12 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Tdrd12 gene.

*Literature published using this strain should indicate: Tdrd12-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
