

C1qtnf2-Flox

系統名	C57BL/6Smoc- <i>C1qtnf2</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol C1qtnf2	Synonyms	Adih, CTRP2, 1810033K05Rik
	NCBI ID	69183
	MGI ID	1916433
	Ensembl ID	ENSMUSG00000046491
	Human Ortholog	C1QTNF2

説明

These mice carry loxP sites flanking target exons of C1qtnf2 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of C1qtnf2 gene.

*Literature published using this strain should indicate: C1qtnf2-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
