

Kif18a-Flox

系統名	C57BL/6Smoc- <i>Kif18a</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Kif18a	Synonyms	gcd2, AU024633, B130001M12Rik
	NCBI ID	228421
	MGI ID	2446977
	Ensembl ID	ENSMUSG00000027115
	Human Ortholog	KIF18A

説明

These mice carry loxP sites flanking target exons of Kif18a gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Kif18a gene.

*Literature published using this strain should indicate: Kif18a-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
