

Ahcyl1-Flox

系統名	C57BL/6Smoc- <i>Ahcyl1</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Ahcyl1	Synonyms	DCAL, Irbit, AA409031, AA414901, Ahcy-rs3, 1110034F20Rik
	NCBI ID	229709
	MGI ID	2385184
	Ensembl ID	ENSMUSG00000027893
	Human Ortholog	AHCYL1

説明

These mice carry loxP sites flanking target exons of Ahcyl1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ahcyl1 gene.

*Literature published using this strain should indicate: Ahcyl1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
