

Il18bp-Flox

| | |
|--------|---|
| 系統名 | C57BL/6Smoc- <i>Il18bp</i> ^{em1(flox)Smoc} |
| SMOC番号 | NM-CKO-241118 |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|-----------------------|-----------------------|------------------------------------|
| Gene Symbol Il18bp | Synonyms | MC54L; Igifbp; IL-18BP |
| | NCBI ID | 16068 |
| | MGI ID | 1333800 |
| | Ensembl ID | ENSMUSG00000070427 |
| | Human Ortholog | IL18BP |

説明

These strains carry loxP sites flanking exon 2-4 of Il18bp gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Il18bp gene.

*Literature published using this strain should indicate: Il18bp-Flox mice (Cat. NO. NM-CKO-241118) were purchased from Shanghai Model Organisms Center, Inc..
