

Eif4ebp2-Flox

系統名	C57BL/6Smoc- <i>Eif4ebp2</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Eif4ebp2	Synonyms	4E-BP2, PHAS-II, AA792569, BC010348, 2810011119Rik
	NCBI ID	13688
	MGI ID	109198
	Ensembl ID	ENSMUSG00000020091
	Human Ortholog	EIF4EBP2

説明

These mice carry loxP sites flanking target exons of *Eif4ebp2* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Eif4ebp2* gene.

*Literature published using this strain should indicate: *Eif4ebp2*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
