

Insyn2a-Flox

系統名	C57BL/6Smoc- <i>Insyn2a</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Insyn2a	Synonyms	InSyn2, Fam196a, B830028B13Rik
	NCBI ID	627214
	MGI ID	3605068
	Ensembl ID	ENSMUSG00000073805
	Human Ortholog	INSYN2A

説明

These mice carry loxP sites flanking target exons of *Insyn2a* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Insyn2a* gene.

*Literature published using this strain should indicate: *Insyn2a*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
