	Human Ortholog	IL1F10

## 説明

These mice carry loxP sites flanking target exons of Il1f10 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Il1f10 gene.

\*Literature published using this strain should indicate: Il1f10-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
