

Btaf1-Flox

系統名	C57BL/6Smoc- <i>Btaf1</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Btaf1	Synonyms	TAF170, AI414500, AI447930, E430027O22Rik
	NCBI ID	107182
	MGI ID	2147538
	Ensembl ID	ENSMUSG00000040565
	Human Ortholog	BTA1F1

説明

These mice carry loxP sites flanking target exons of Btaf1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Btaf1 gene.

*Literature published using this strain should indicate: Btaf1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
