

Draxin-Flox

| | |
|--------|---|
| 系統名 | C57BL/6Smoc- <i>Draxin</i> ^{em1(flox)Smoc} |
| SMOC番号 | TBD |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|-----------------------|-----------------------|------------------------------------|
| Gene Symbol Draxin | Synonyms | neucrin, 2610109H07Rik |
| | NCBI ID | 70433 |
| | MGI ID | 1917683 |
| | Ensembl ID | ENSMUSG00000029005 |
| | Human Ortholog | DRAXIN |

説明

These mice carry loxP sites flanking target exons of Draxin gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Draxin gene.

*Literature published using this strain should indicate: Draxin-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
