

Insyn2b-Flox

系統名	C57BL/6Smoc- <i>Insyn2b</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Insyn2b	Synonyms	Gm6041, Fam196b, EG574403
	NCBI ID	574403
	MGI ID	3643491
	Ensembl ID	ENSMUSG00000069911
	Human Ortholog	INSYN2B

説明

These mice carry loxP sites flanking target exons of *Insyn2b* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Insyn2b* gene.

*Literature published using this strain should indicate: *Insyn2b*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
