

Slco1c1-Flox

系統名	C57BL/6Smoc- <i>Slco1c1</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Slco1c1	Synonyms	Oatp2, Oatpf, OATP-F, OATP-14, Slc21a14
	NCBI ID	58807
	MGI ID	1889679
	Ensembl ID	ENSMUSG00000030235
	Human Ortholog	SLCO1C1

説明

These mice carry loxP sites flanking target exons of Slco1c1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Slco1c1 gene.

*Literature published using this strain should indicate: Slco1c1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
