## 説明

These strains carry loxP sites flanking exon 2 of Muc20 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Muc20 gene.

\*Literature published using this strain should indicate: Muc20-Flox mice (Cat. NO. NM-CKO-240617) were purchased from Shanghai Model Organisms Center, Inc..

## 表現型データ
