

Dpt-Flox

系統名	C57BL/6Smoc- <i>Dpt</i> ^{Em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Dpt	Synonyms	Eq1, EQ-1, 1810032B19Rik, 5033416F05Rik
	NCBI ID	56429
	MGI ID	1928392
	Ensembl ID	ENSMUSG00000026574
	Human Ortholog	DPT

説明

These mice carry loxP sites flanking target exons of Dpt gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Dpt gene.

*Literature published using this strain should indicate: Dpt-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
