

Asprv1-Flox

系統名	C57BL/6Smoc- <i>Asprv1</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Asprv1	Synonyms	SASP, Taps, SASPase, AA986851, 2300003P22Rik
	NCBI ID	67855
	MGI ID	1915105
	Ensembl ID	ENSMUSG00000033508
	Human Ortholog	ASPRV1

説明

These mice carry loxP sites flanking target exons of *Asprv1* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Asprv1* gene.

*Literature published using this strain should indicate: *Asprv1*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
