

Slc6a5-Flox

系統名	C57BL/6Smoc- <i>Slc6a5</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Slc6a5	Synonyms	Glyt2, prestin
	NCBI ID	104245
	MGI ID	105090
	Ensembl ID	ENSMUSG00000039728
	Human Ortholog	SLC6A5

説明

These mice carry loxP sites flanking target exons of *Slc6a5* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Slc6a5* gene.

*Literature published using this strain should indicate: *Slc6a5*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
