

Aplnr-Flox

| | |
|--------|--|
| 系統名 | C57BL/6Smoc- <i>Aplnr</i> ^{tm1(flox)Smoc} |
| SMOC番号 | NM-CKO-233990 |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|-----------------------------|-----------------------|------------------------------------|
| Gene Symbol Aplnr | Synonyms | APJ; Agtrl1; msr/apj |
| | NCBI ID | 23796 |
| | MGI ID | 1346086 |
| | Ensembl ID | ENSMUSG00000044338 |
| | Human Ortholog | APLNR |

説明

These strains carry loxP sites flanking exon 1 of *Aplnr* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Aplnr* gene.

*Literature published using this strain should indicate: *Aplnr*-Flox mice (Cat. NO. NM-CKO-233990) were purchased from Shanghai Model Organisms Center, Inc..
