

Mycn-Flox

系統名	C57BL/6Smoc- <i>Mycn</i> ^{tm1(flox)Smoc}
SMOC番号	NM-CKO-210183
維持形態	Sperm cryopreservation

遺伝子の概要

Gene Symbol Mycn	Synonyms	Nmyc, N-myc, Nmyc1, Nmyc-1, c-nmyc, bHLHe37
	NCBI ID	18109
	MGI ID	97357
	Ensembl ID	ENSMUSG00000037169
	Human Ortholog	MYCN

説明

These mice carry loxP sites flanking exon 2-3 of *Mycn* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Mycn* gene.

*Literature published using this strain should indicate: *Mycn*-Flox mice (Cat. NO. NM-CKO-210183) were purchased from Shanghai Model Organisms Center, Inc..
