

Procr-Flox

| | |
|--------|--|
| 系統名 | C57BL/6Smoc- <i>Procr</i> ^{em1(flox)Smoc} |
| SMOC番号 | NM-CKO-232172 |
| 維持形態 | Sperm cryopreservation |

遺伝子の概要

| | | |
|-----------------------------|-----------------------|------------------------------------|
| Gene Symbol Procr | Synonyms | Ccca; Epcr; Ccd41; AI325044 |
| | NCBI ID | 19124 |
| | MGI ID | 104596 |
| | Ensembl ID | ENSMUSG00000027611 |
| | Human Ortholog | PROCR |

説明

These strains carry loxP sites flanking exon 2-4 of Procr gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Procr gene.

*Literature published using this strain should indicate: Procr-Flox mice (Cat. NO. NM-CKO-232172) were purchased from Shanghai Model Organisms Center, Inc..
