

Aldh5a1-Flox

系統名	C57BL/6Smoc- <i>Aldh5a1</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Aldh5a1	Synonyms	Ahd1, Ahd-1, SSADH, Ssdh1, 6330403E24Rik, D630032B01Rik
	NCBI ID	214579
	MGI ID	2441982
	Ensembl ID	ENSMUSG00000035936
	Human Ortholog	ALDH5A1

説明

These mice carry loxP sites flanking target exons of *Aldh5a1* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Aldh5a1* gene.

*Literature published using this strain should indicate: *Aldh5a1*-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
