

Myf5-Flox

| | |
|--------|---|
| 系統名 | C57BL/6Smoc- <i>Myf5</i> ^{em1(flox)Smoc} |
| SMOC番号 | NM-CKO-241436 |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|---------------------|-----------------------|------------------------------------|
| Gene Symbol Myf5 | Synonyms | Myf-5; bHLHc2; B130010J22Rik |
| | NCBI ID | 17877 |
| | MGI ID | 97252 |
| | Ensembl ID | ENSMUSG00000000435 |
| | Human Ortholog | MYF5 |

説明

These strains carry loxP sites flanking exon 1 of Myf5 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Myf5 gene.

*Literature published using this strain should indicate: Myf5-Flox mice (Cat. NO. NM-CKO-241436) were purchased from Shanghai Model Organisms Center, Inc..
