

Gadd45gip1-Flox

| | |
|--------|---|
| 系統名 | C57BL/6Smoc- <i>Gadd45gip1</i> ^{em1(flox)Smoc} |
| SMOC番号 | TBD |
| 維持形態 | Developing |

遺伝子の概要

| | | |
|---------------------------|----------------|---|
| Gene Symbol Gadd45gip1 | Synonyms | Crif1, Plinp1, MRP-L59, AI425883, 2310040G17Rik |
| | NCBI ID | 102060 |
| | MGI ID | 1914947 |
| | Ensembl ID | ENSMUSG00000033751 |
| | Human Ortholog | GADD45GIP1 |

説明

These mice carry loxP sites flanking target exons of Gadd45gip1 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Gadd45gip1 gene.

*Literature published using this strain should indicate: Gadd45gip1-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

病気の予測

| | | |
