

HCC-95

Strain Information

SMOC番号 NM-F22

Cell Line HCC-95

維持形態 Validation of tumorigenic capacity completed

説明 HCC-95 is a human non-small cell lung cancer (NSCLC), squamous cell carcinoma cell line.

*Literature published using this strain should indicate: HCC-95 cell line (Cat. NO. NM-F22) was purchased from Shanghai Model Organisms Center, Inc..

表現型データ

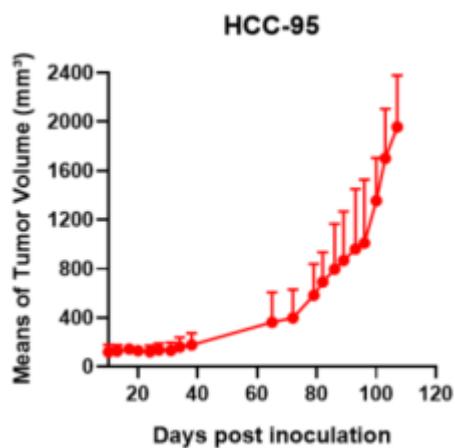

Figure 1. Tumor growth curve of HCC-95 xenograft model (n=5)

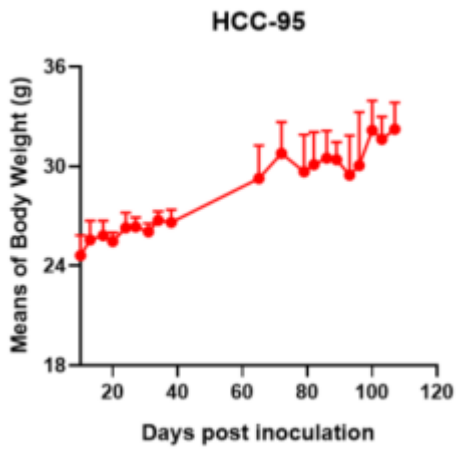

Figure 2. Body weight change of HCC-95 xenograft model (n=5)

*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
