説明

These mice carry loxP sites flanking exon 3 of G6pc gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of G6pc gene.

応用分野: Diseases associated with G6PC include Glycogen Storage Disease Ia and Hypoglycemia.

*Literature published using this strain should indicate: G6pc-Flox mice (Cat. NO. NM-CKO-200053) were purchased from Shanghai Model Organisms Center, Inc..
