

Slc32a1-Flox

系統名	C57BL/6Smoc- <i>Slc32a1</i> ^{em1(flox)Smoc}
SMOC番号	NM-CKO-200219
維持形態	Sperm cryopreservation

遺伝子の概要

Gene Symbol Slc32a1	Synonyms	VGAT; Viaat; R75019
	NCBI ID	22348
	MGI ID	1194488
	Ensembl ID	ENSMUSG00000037771
	Human Ortholog	SLC32A1

説明

These mice carry loxP sites flanking exon 2 of *Slc32a1* gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of *Slc32a1* gene.

応用分野: The study of synaptic vesicle cycle and GABAergic synapse

*Literature published using this strain should indicate: *Slc32a1*-Flox mice (Cat. NO. NM-CKO-200219) were purchased from Shanghai Model Organisms Center, Inc..
