

# HBV-Tg

系統名	B6.Cg-Tg(HBV)Smoc
SMOC番号	NM-TG-00003
維持形態	Repository Live

## 遺伝子の概要

Gene Symbol	Synonyms	Hepatitis B virus isolate C8 complete genome
	NCBI ID	<a href="#">AF461363</a>
	MGI ID	<a href="#">Null</a>
	Ensembl ID	<a href="#">Null</a>

## 説明

Full-length HBV genome (adrsubtype,C genotype) was used to establish the transgenic mice. HBsAg was positive in transgenic mice serum; no serum HBeAg anti-HBs, anti-HBe, or antiHBc was detected. No anti-HBs or anti-HBe was detected in the polyethylene gly.

**応用分野:** HBV

\*Literature published using this strain should indicate: HBV-Tg mice (Cat. NO. NM-TG-00003) were purchased from Shanghai Model Organisms Center, Inc..

## 表現型データ

Fig1. Immuno-histochemical staining of HBsAg in the liver and kidney sections of #59 transgenic mice. Sections of liver (A) or kidney (B) tissues from #59 transgenic mice were stained for HBsAg.

Fig2. Immuno-histochemical staining of HBcAg in the liver and kidney sections of #59 transgenic mice.

Sections of liver (A) or kidney (B) tissues from #59 transgenic mice were stained for HBcAg.

Gene	Microarray <sup>a</sup>	Real-time PCR <sup>a</sup>
Complement component 3 (C3)	32	251
C-reactive protein (CRP)	48	>1,000
Fibrinogen (FGG)	60	138
FBJ osteosarcoma oncogene (Fos)	-8	-5
Mannose binding lectin (MBL2)	128	192
Mitochondrial ribosomal protein L15 (Mrpl15)	-6	1
Plasminogen (PLG)	446	1,000
Serum amyloid A 1 and 2 (Saa1 and 2)	60	287

<sup>a</sup>The numbers represent the folds of mRNA of the genes being up- or down-regulated.
